TITLE : REMEDY FOR DERMATOMYCOSIS

ABSTRACT : PURPOSE: A remedy for dermatomycosis, containing a dehydroacetic acid and tri- methyl or benzyl surfactant as active constituents, having a synergistic antimicrobial activity, and used for pompholyx trichophytosis, etc.

CONSTITUTION: A remedy for dermatomycosis containing at least one of dehydro- acetic acid or a salt thereof, e.g. sodium dehydroacetate or potassium dehydroacetate, and trimethyl or benzyl cationic surfactant expressed by formulalor II (R is alkyl; X is halogen), e.g. dodecyltrimethylammonium chloride expressed by formula III or tetradecyldimethylbenzylammonium expressed by formula IV. The remedy has a high effect when R is about 8-20 carbon atoms. The remedy containing 70wt% or more, preferably 90-99.99wt%, dehydroacetic acid has a great synergistic effect of the two constituents. The remedy is brought into contact with the affected part of dermatomycosis in the form of a solution, ointment, etc. by any means of spraying, dipping, coating, etc.
